FedLearn

TRANSFORMING LEARNING
FOR DEFENSE AND INTELLIGENCE ORGANIZATIONS

SUPERCHARGED BY ARTIFICIAL INTELIGENCE

FedLearn is the first online, artificial intelligence-enabled learning provider delivering specialized and contextualized content to the Federal government, particularly to the U.S. Department of Defense and Intelligence Community.

Our learning experience platform is powered by *250 patented, predictive algorithms*. Our AI tracks and analyzes user behaviors to identify individual learning styles to **detect if learning is actually occurring in real time with 90%+ accuracy**.*

Only our AI can quantify learning absorption and learner engagement, which are measured by collecting and analyzing learner clickstream data and time spent taking courses and reviewing content. **No other learning provider to the Federal government and government contractor markets offers these cutting-edge features.**

Are your learners *really* learning? *We guarantee we know!*

KEY BENEFITS

AI-powered metrics for learning ROI measurements

Contextualized content for faster time to proficiency

Cost-effective to accomodate budgets of all sizes

Scalable to meet the needs of any organization

Agile to address changing mission requirements

ENHANCED LEARNING OUTCOMES

Increases in learning absorption and learner engagement lead to *statistically significant improvements* in post-course assessment scores.*

Our AI reduces knowledge acquisition time—*accelerating learner skill development and reducing time to proficiency.* This equates to **improved returns on your organization's investments in workforce development**.
